

Markup Validation Service

Check the markup (HTML, XHTML, ...) of Web documents

Jump To: [Potential Issues](#) [Congratulations · Icons](#)

This Page Is *Tentatively* Valid XHTML 1.0 Transitional

Result:	Tentatively passed validation, 1 warning(s)		
File :	Choose File no file selected Use the file selection box above if you wish to re-validate the uploaded file 1111111.html		
Encoding :	utf-8	utf-8 (Unicode, worldwide)	
Doctype :	XHTML 1.0 Transitional	XHTML 1.0 Transitional	
Root Element:	html		
Root Namespace:	http://www.w3.org/1999/xhtml		

Options

- ☐ Show Source ☐ Show Outline ☒ List Messages Sequentially ☐ Group Error Messages by type
- ☐ Validate error pages ☐ Verbose Output ☐ Clean up Markup with HTML Tidy

[Help](#) on the options is available.

Revalidate

Potential Issues

The following missing or conflicting information caused the validator to perform guesswork prior to validation. If the guess or fallback is incorrect, it may make validation results entirely incoherent. It is *highly recommended* to check these potential issues, and, if necessary, fix them and re-validate the document.

DOCTYPE Override in effect!

The detected DOCTYPE Declaration "<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Transitional//EN" "http://www.w3.org/TR/xhtml1/DTD/xhtml1-transitional.dtd">" has been suppressed and the DOCTYPE for "XHTML 1.0 Transitional" inserted instead, but even if no errors are shown below the document will not be Valid until you update it to reflect this new DOCTYPE.

Congratulations

The uploaded document "1111111.html" was checked and found to be *tentatively* valid XHTML 1.0 Transitional. This means that with the use of some fallback or override mechanism, we successfully performed a formal validation using an SGML or XML Parser. In other words, the document would validate as XHTML 1.0 Transitional if you changed the markup to match the changes we have performed automatically, but **it will not be valid until you make these changes**.

Validating CSS Style Sheets

If you use [CSS](#) in your document, you can check it for validity using the W3C [CSS Validation Service](#).
